

COMPONENTS

Aerators, control panels, and accessory equipment from Clearstream Systems are manufactured according to the strictest guidelines. You know when you buy parts from Clearstream Systems, you are getting the highest quality and most compatible with your system. We have a long history of providing our customers with the most reliable components created with top quality materials while still being offered at a reasonable price.

TWO-YEAR WARRANTY

Clearstream Systems provides a two-year warranty on its equipment, without hidden conditions. We are confident of the durability and quality of our systems, so our warranty is simple. If the equipment is defective, we will either replace it with new components or repair the existing system at no charge. No explanations required.

Clearstream Wastewater Treatment Systems have been tested and certified by NSF International and GCT to meet and exceed the requirements of the American National Standard 40 evaluation developed by NSF International and the Council of Public Health Consultants. Our treatment systems also meet the NSF/ANSI Standard 245 for nitrogen reduction and NSF/ANSI 350 certification for wastewater reuse. In addition to this testing, Clearstream Systems has successfully marketed its treatment systems nationally and internationally to meet a wide range of regulatory requirements. You can count on the highest quality in your Clearstream product.

WHY INSTALLERS for Clearstream® Wastewater Systems Recommend Us

SUPPORT

When you're in the field, you need to know you have the support of the manufacturer and confidence in the products and systems you recommend. As a leader in the field of wastewater treatment, you can count on

Clearstream Wastewater Systems to provide not only the best and most reliable systems for your customers, but we back that up with a two year warranty.

TRAINING

New installers can take advantage of decades of knowledge and engineering expertise that we put into every system we design and manufacture. Training is

available for all systems to our new installers and continuing education is provided for every new system or component so that our installers can feel confident when offering system maintenance. On-site instruction as well as reference materials including product manuals and installation guidelines that you can refer to at your leisure or on the job.

PARTS AND COMPONENTS

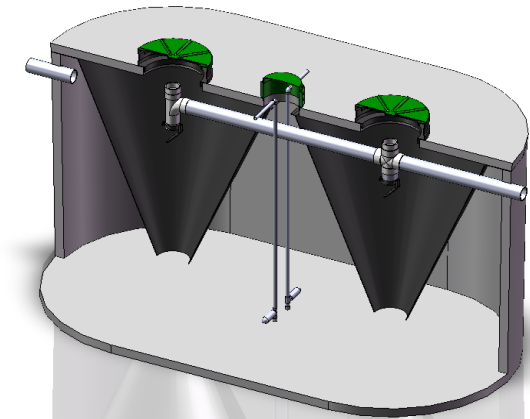

All parts and components for Clearstream Systems are engineered and designed for durability. Talk to our knowledgeable installer support team to get the parts you need no matter the date of installation. Your customer's satisfaction is our goal.

SIMPLICITY OF DESIGN

When we design our systems, we keep quality and durability top of mind, but we also keep the ease of maintenance in mind so that you can easily maintain our systems and keep your customers happy. Components in Clearstream Wastewater Systems are designed for easy access. Your time is valuable, so we design our systems so you don't have to waste any on difficult access.

When You Need to Update or Repair...

The simple, compact design of the Clearstream System makes it easy to install and maintain. For example, the 115v aerator is located remotely to prevent water damage or corrosion that can occur in tank mounted aerators. This durable, high quality aerator uses very little electricity, is easy to rebuild, and easy and fast to replace, taking less than five minutes.

Choosing parts from Clearstream Wastewater for your system repairs and updates means that you have selected the part that will work in perfect harmony with your wastewater system.

All of our parts and components are built to work with the Clearstream System and to ensure long life and efficient operation for your wastewater system.
